

FUNNZ FORAY REPORT FOR 2012

Jerry Cooper, 14th July 2012

STATISTICS

424 records added to the FUNNZ database (746 on the 2011 Foray)

The FUNNZ database now contains 8399 records

The 420 records represent 241 taxa (347 taxa on the 2011 Foray)

119 specimens were added to the PDD national collection (149 on the 2011 foray).

The number of records from the 2012 foray was significantly below previous years, perhaps due to a combination of fewer forayers and frosts reducing fruiting.

SITES WITH MOST COLLECTIONS

The Lake Monowai area was the most productive with about 90 collections

NEW RECORDS FOR NEW ZEALAND

Rhinotrichella globulifera is a parasitic hyphomycete growing over other fungi. It was growing over *Hypomyces aurantiacus*, itself growing on a bracket fungus *Fomes hemitephrus* (See [Mycological Notes 4](#)). *Psilocybe fimetaria* was added to the New Zealand list although it has previously been recorded with the incorrect name *Psilocybe coprophila*. *Phomatospora arenaria* and *Tiarospora perforans* are inconspicuous fungi on dead stems of Marram grass.

ASSESSMENT USING DOC CRITERIA FOR CONSERVATION STATUS

The threat classification for fungi now employs the [2008 criteria](#).

1 record of a Nationally Critical fungus: *Cortinarius magellanicus* (as *Cortinarius* c.f. *magellanicus*)

1 record of a Nationally Endangered fungus: *Lepiota* (= *Rhodocollybia*) *purpurata*

2 records of Nationally Vulnerable fungi: *Cortinarius austrocyaneus*, *Hebeloma aminophilum* (5 collections)

2 records of Naturally Uncommon fungi: *Russula griseostipitata*, *Russula rimulosa*

37 records of fungi current Data Deficient (54 collections): *Badhamia utricularis*, *Cheimonophyllum candidissimum*, *Chlorociboria argentinensis*, *Clavogaster novozelandicus*, *Cortinarius bellus*, *Cortinarius cardinalis*, *Cortinarius caryotis*, *Cortinarius collybianus*, *Cortinarius cremeolinus*, *Cortinarius dulciolens*, *Cortinarius epiphaeus*, *Cortinarius icterinoides*, *Cortinarius marmoratus*, *Cortinarius papaver*, *Cortinarius persplendidus*, *Cortinarius saturniorum*, *Cortinarius taylorianus*, *Cortinarius tessiae*, *Cortinarius ursus*, *Cortinarius vitreopileatus*, *Entoloma perzonatum*, *Gloiocephala nothofagi*, *Gymnopus readiae*, *Hygrophorus involutus*, *Hymenochaete innexa*, *Hymenopellis colensoi*, *Inocybe luteobulbosa* var. *luteobulbosa*, *Inocybe scabriuscula*, *Lentinellus pulvinulus*, *Marasmius croceus*, *Marasmius kanukaneus*, "*Pestalotiopsis* sp. ""desmoschoenus""", *Pholiota chrysmoides*, *Pseudaegerita viridis*, *Ramaria samuelsii*, *Stigmatidium apophlaeae*, *Tolypocladium inflatum*.

NOTES ON SELECTED SPECIES.

Any notes on species will now appear on the FUNNZ Mycoblog. For notes on fungi from this foray see [Mycological Notes 4](#) and 6.

Foray Report 2012

Fungus Name	FUNNZ Collection Number	Herbarium Accession	Association Name	Substrate	Collection Date	Collectors Number	Collector	Determiner	Locality
Aleurodiscus berggrenii	2012/0875		Nothofagus solandri var. cliffortioides	wood	11/05/2012		P White	JA Cooper	Rainbow Reach, Kepler Track
